**Delivery** incl. protective cover and wall bracket

### Wall-mounted umbrella P3

The stable one. The wall-mounted umbrella without a gas pressure spring is suspended in the wall bracket and can be removed from the bracket with a few hand movements.

### Wall-mounted umbrella P4

For greater convenience: With the aid of a gas pressure spring, the arm can be lowered to 45° to make operation easier. The umbrella carrier arm is firmly screwed to the wall bracket.
